

GENCAD Conference 1: Gender and health – a challenge for the 21st century

Brussels, 1.3.2017

About the Conference

The conference will focus on gender specific disease manifestations, treatments and outcomes, which the general population and the community of physicians are becoming increasingly aware of. The role of gender differences in manifesting disease, particularly cardiovascular diseases, has become more apparent to both physicians and the public at large. Gender-dependent differences in pharmacotherapy and its outcomes are especially relevant for providing adequate treatment.

Both elements are going to be featured in factsheets in all EU Member State languages that will be introduced at this conference and discussed with the participants.

Each of 28 Member States will be represented by national representatives with expertise on gender in cardiovascular disease and prevention and in gender in health policies. Opinion and policy leaders from all the Member States will be invited to discuss country specific relevance of the findings. The goal is to raise the level of awareness among participants and to provide them with useful and relevant information, so that they can then share this knowledge with their respective peer communities.

A welcome dinner will be offered at 28.2.2017, 20.00 h, Hotel Thon, City Centre, Brussels

Aim of the conference

The conference aims mainly to:

- Present the results of the project – the most prominent, clinically relevant and best evaluated sex and gender differences in coronary artery disease, as an example for other frequent diseases
- Discuss regional differences in gender specific disease manifestations, treatments and outcomes within Europe
- Discuss the impact of gender on health-related quality of life and healthcare policy.
- Discuss gender differences with patient organisations, health care system representatives and policy makers.

Venue

Thon Hotel Brussels City Centre – Avenue du Boulevard 17, B-1210 Brussels, Belgium.
We will be happy to reserve a hotel room for you there.

Programme

Conference programme: 1.3.2017 (PDF). The programme starts at 8.30 and closes at 16.30.

Participants

Around 100 participants (e.g. representatives from health ministries, national contact points, patients organisations, healthcare providers, Insurers, policy makers, journalists).
GENCAD is a conference by invitation, aiming at high level contribution from all EU MS, but a few fully or partially sponsored slots are still available, please contact gim.office@charite.de.

Registration

As places are limited for this event, all registrations are by invitation only from the European Commission. To receive an invitation, please contact gim-office@charite.de. Those confirmed to the conference should register by 15 January 2017.
